

# Print to actual size - US letter

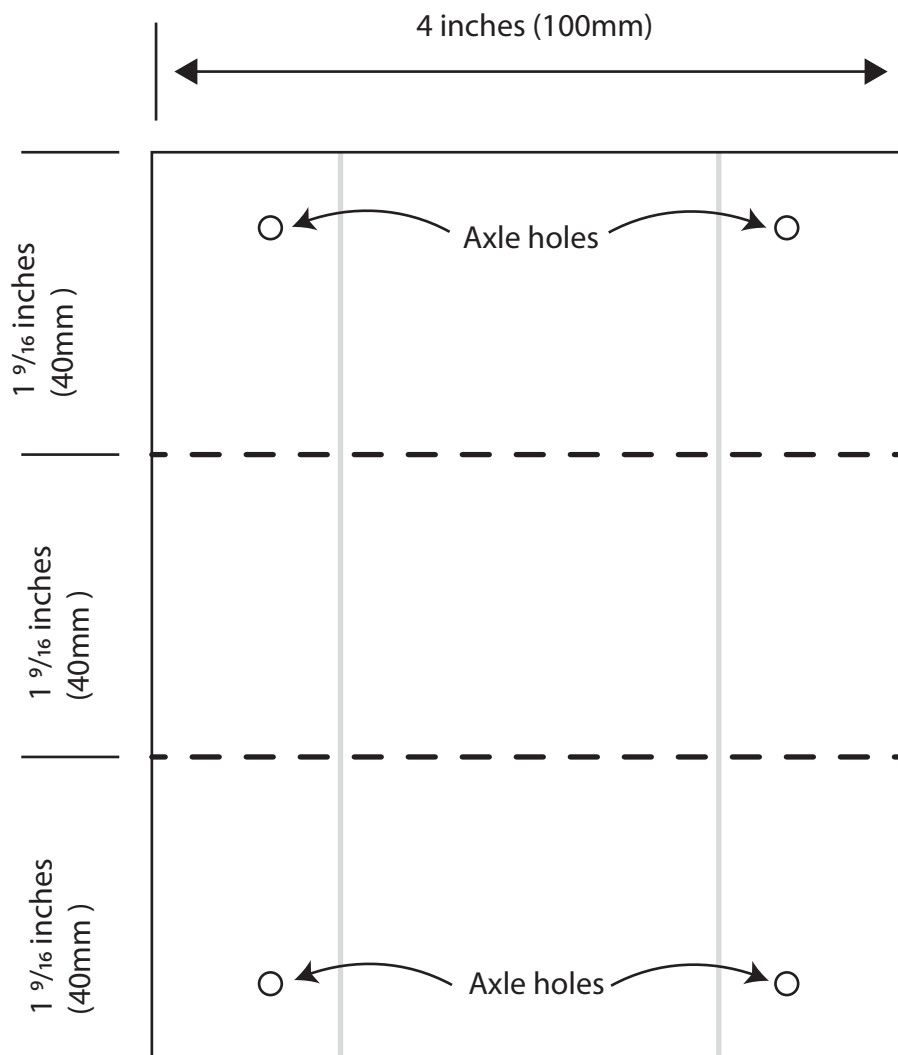

## Key

Dashed lines - fold down (valley fold)

Gray/gray lines - where spacer pieces will eventually be placed.

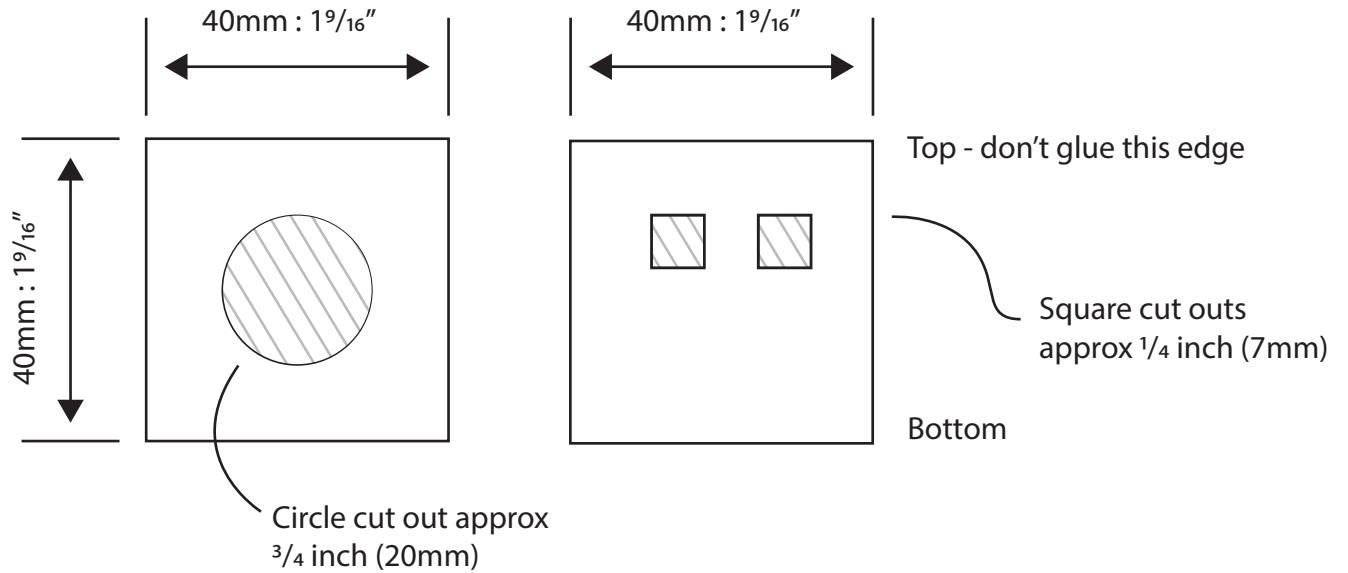

## Rover body

Print onto thick, shiny cardstock/card and cut out. If this isn't possible, print onto plain paper, then trace onto the cardstock/card, making sure to trace the small circles (where the holes need to be made), fold lines and spacer lines.

# Spacers

Print, trace onto corrugated cardboard and cut out.  
Carefully cut out the middle shapes (indicated with stripes), too.

# Washers

Print, trace onto corrugated cardboard and cut out.  
Carefully make holes (see page 11 in book) over the middle circles.
