

OUR MISSION

The Big Questions Answered is on a mission to show kids the game-changing world of science.

Spark children's natural curiosity and explore the fascinating world of science with this captivating narrative non-fiction series. Each book makes complex scientific concepts accessible and exciting, inspiring the next generation of young scientists!

MORE THAN JUST BOOKS

This is more than just a series of books; it is a complete resource, with lots of **FREE** resources to support each book.

THE BIG QUESTIONS ANSWERED

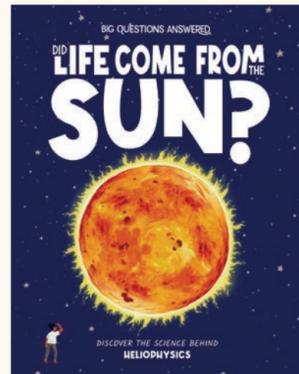

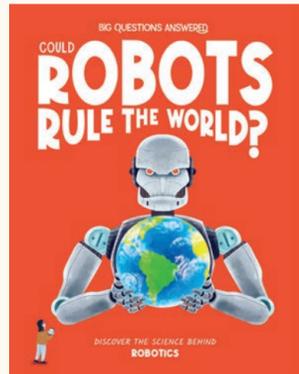

Inspirational, narrative non-fiction books, which will switch kids onto science

TAKE A LOOK INSIDE...

ROBOTICS

We know robots can do all sorts of incredible things... but could these machines one day take over the world as we know it?

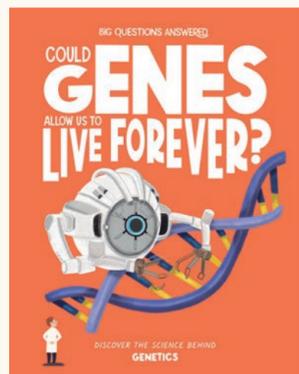

The Sun gives us life here on Earth... but could life have actually started from it? Uncover the mysteries of this powerful star.

HELIOPHYSICS

GENETICS

Our genes are incredibly important, but could they hold the secret to living forever? Explore the science behind this exciting possibility.
